

Brief Biography

Ryan T. Moore*

22 September 2008

Ryan T. Moore is assistant professor of Political Science at Washington University in St. Louis. He earned his Ph.D. from the Department of Government at Harvard University in 2008.

Professor Moore is an affiliate of the research network on Experiments on Governance and Policy (EGAP), and Washington University's Institute for Public Health. At Harvard, he was a doctoral fellow of the Inequality and Social Policy program, and a graduate associate of the Institute for Quantitative Social Science (IQSS).

Professor Moore's research interests center around American social policy and statistical political methodology. Substantively, he is interested in the intersection of direct democracy, federalism, and the politics of old age pensions and health care. Methodologically, he develops and implements methods for political experiments, ecological data, missing data, and causal inference.

As a professor and graduate student, Moore has taught graduate-level mathematical modeling, introductory statistical methods, hierarchical Bayesian modeling, and statistical techniques for litigation research. He has also trained post-bachelor fellows in health policy in a variety of advanced statistical topics. He has advised five honors undergraduate theses in American politics and policymaking.
